Product #191A

CERTIFICATE OF ANALYSIS
TETANUS TOXOID
from *Clostridium tetani*
Lot #19121A1A

New Formulation

Contents

Each vial, when reconstituted with 50 µl of water, contains 25 µg of tetanus toxoid in 100 mM Histidine, 100 mM NaCl, pH 7.0 and 2% Trehalose. **Handle product gently; do not vortex.**

Concentration

Protein concentration is determined by measuring the absorbance at 280 nm using an extinction coefficient of 1.24 for a concentration of 1 mg/ml.

Toxicity

This product is produced from tetanus toxin by inactivation with formaldehyde. The resulting toxoid is essentially nontoxic. At the highest dose tested (15 µg/mouse), all CF-1 mice survived the test period and gained weight. No signs of illness or spastic paralysis were observed during the seven day observation period.

Assay Results

In immunodiffusion studies, tetanus toxoid shows immunoprecipitation with an antiserum specific to tetanus toxoid.

The endotoxin content, determined using a kinetic chromogenic LAL assay, is 335 EU/mg.

Packaging and Storage

Tetanus toxoid is supplied as a lyophilized powder, sealed under vacuum. Store at 2-8°C prior to reconstitution. Following reconstitution, aliquot and freeze.

Handling

Good laboratory technique should be employed in the safe handling of this product. Wear appropriate laboratory attire including a lab coat, gloves and safety glasses. Nitrile gloves are recommended for use when handling lyophilized material.

This product is intended for research purposes by qualified personnel only. It is not intended for use in humans or as a diagnostic agent. List Biological Laboratories, Inc., is not liable for any damages resulting from the misuse or handling of this product.

FOR RESEARCH PURPOSES ONLY. NOT FOR HUMAN USE.
